Training

Create sustainable futures with balanced technology management.

Zone'in Training licenses private & public sector registered occupational therapists, to provide Foundation Series Workshops to parents, health and education professionals. Offering leading edge information and innovative techniques and proven tools, pediatric therapists bring parents and teachers into the 21st century, and students to academic excellence!

"Thank you Cris for supporting us teachers"
CBC Interview Quote

Cris Rowan speaks:

Occupational Therapist and Creator of Zone'in Programs Inc.

"Escalating use of technology by children goes largely unchecked by society, resulting in epidemic levels of child physical, mental and behavior disorders. This technology overuse is causing irreversible changes to children's neural circuitry, with devastating effects to family, education and healthcare systems. Sustainability of children requires balanced technology management initiatives at work, school and home. Children are our future."
