Pertinent Keynotes for Today's Children

Cris Rowan...

committed to easing the job of learning for children is a well-known speaker and author to teachers, parents and therapists throughout North America in the field of Sensory Integration, Learning, Attention, Fine Motor Skills and the impact of TV and videogames on children's neurological development. Cris has a BSc's both in Occupational Therapy and in Biology and is a SIPT certified Pediatric Sensory Specialist. Over the past decade, Cris has provided over 200 keynotes and workshops, published the monthly Development Series Newsletter, created the Zone'in and Move'in Educational Programs for schools and homes, and started Rowan Training Systems for registered Occupational Therapists. Cris chairs the BCSOT Pediatric and Sensory Integration Special Interest Groups, has written numerous articles for international journals, and is in the process of completing her first book *A Cracked Foundation: The Damaging Effects of Technology on Child Development*.
