Liked presentation style	44%	50%	6%		
Appropriate amount of information	61%	33%	6%		
Good pace to presentation	39%	39%	22%		

Additional Comments:

- Morning workshop was more useful for me. Afternoon workshop way more interesting for those working with K-3 grades. I liked the Zone part the best.
- Really enjoyed the interaction in this workshop. HANDS ON LEARNING!
- Very useful information that can be implemented quickly. I like th kit with DVD's and website access. Good researched backed information
- Extremely valuable information
- Great workshop – but should go with time stated of 9-4 pm and not have a short lunch for earlier quit time
- There wasn't enough time at the end, but I thought this was a good presentation. Maybe put into 2 days so you can go into more detail and not be so rushed
- Need more time/longer workshop would be a great idea, otherwise it was great! Thank you soooo much for this opportunity
- Very well done. Covered a lot of information, Thank You!
- This is really really needed in university! (Liza Brereton)
- Would like more hands on with the stuff
- Too much sitting and being talked at
- I'm very excited to use these strategies in my classroom!

Would you recommend this workshop to others?

- Yes – those who are working with preschool or youth as they will really like this workshop
- Yes – very useful for all types of teachers. So everyone knows the types of strategies that are very helpful
- Yes – it would be good for the elementary classrooms to get a good base for writing
- Yes – interesting relevant information providing insight to child behavior

- Yes – these sensory strategies can benefit all children in the class, not just those with learning deficits
- Yes – they can be useful in the class
- Yes – very user friendly and provides ideas you can use the next day in the classroom
- Yes – printing: very good method
- Yes – it would be good for the summer workers that work with children science program, English etc.
- Thank you! It is helpful with our children with teaching printing and body movements needed to learn
- I found it very useful on how to teach children how to write, and different exercises for children to get them in their Zone to learn. I felt it should be put into 2 workshops, it felt too rushed and I would have liked more detail
- Well worth it – hand eye coordination is critical o brain development – and impacts many areas of learning! We need more teachers on the same page!
- Very helpful for children with low attention span
- Yes – because I would never know or figure this our on my own – meaning starting at the “trunk → out” when assessing printing ability
- Yes – very useful and informative – needed more time to use the stuff
- Yes – because there are ideas I can use right away, even without purchasing the program
- Yes – very useful for classroom strategies
