Pediatric Occupational Therapist Cris Rowan presented
“A Cracked Foundation” workshop on May 5, 2009
for teachers and OT’s in Halifax, Nova Scotia

What did the participants have to say?

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
The workshop objectives were clearly stated	33%	67%			
The workshop was well organized	50%	50%			
The workshop was just the right length	33%	67%			
The instructor was well informed	67%	33%			
The workshop materials were useful	50%	34%	16%		
The workshop objectives were achieved	16%	68%	16%		

What was the most valuable thing you learned in the workshop?

- Family needs to focus more on quality family time.
- How much time is spent watching TV and the effect it has on children.
- Information about attachment disorders/addiction and connection was good/useful.
- Steps to unplug.
- How much lack of attachment is occurring. Prevalence of addictions, types of attachment disorders.
- Resources that are available for parents.

Was there anything not covered in the workshop that you felt should have been?

(No responses)

How could this workshop have been better or more helpful?

- This workshop could have been a full day. Excellent information.
- Stats more clearly defined.

Would you recommend this workshop to others? If not, why not?

- Yes – excellent for parents.
- Yes
- Depending on the person – a new mom may be overwhelmed feeling they do everything wrong. I found the info was good in theory but not necessarily realistic.

Would you recommend this workshop to others? If not, why not? (cont)

- Yes, I think this would be a great workshop for parents.
- Yes.
- Yes, attachment has huge effects on children and learning.

Any other comments?

- Too bad not more Canadian statistics.
- Very informative.
- (Inverness, NS) – Dr. Fraser Mustard has been working with our community and he has researched a lot about this as well. Especially need to be held in early human development.
- I am a little confused about the causality theory between Autism and ADHD and technology attachment.
