Pediatric Occupational Therapist Cris Rowan presented  
**“Mixed Signals” workshop** on June 2, 2009  
for teachers and OT’s in Vancouver, BC

## *What did the participants have to say?*

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
The workshop objectives were clearly stated	50%	25%	25%		
The workshop was well organized	100%				
The workshop was just the right length	25%	75%			
The instructor was well informed	100%				
The workshop materials were useful	75%		25%		
The workshop objectives were achieved	50%	25%			25%

### What was the most valuable thing you learned in the workshop?

- The impact of technology on today’s children is very strong and negative AND there are not enough Canadian stats/data/studies done in this area.
- Finding out more about the types of technology out there, the stats on them, and the impact/effects on our children (e.g., media violence). Info on how use of technology overuse is actually affecting normal brain development.
- I’ll use the unplug, don’t drug directive. I’ll ask parents about TVVG use. Didn’t realize the implications of it until now. Thanks Cris.

### Was there anything not covered in the workshop that you felt should have been?

- The Zone-in techniques—but maybe that was to do with audience today.

### How could this workshop have been better or more helpful?

### Would you recommend this workshop to others? If not, why not?

- Certainly.
- Yes

### Any other comments?

- Great workshop. Excellent presenter. I really appreciated your willingness to go with questions and discussion.

- The implication that TVVG leads to autism—I would take that out because everything else was entirely professional and you don't want to lose your credibility over 1 slide. I love the discussions and the opportunity to speak up. I usually don't!
- Thank you for the info on meds.
