

Pediatric Occupational Therapist Cris Rowan presented
“Zone’in and Move’in” workshops on September 26, 2008
 to **First Nations teachers in Prince George.**

What did the participants have to say?

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
This workshop was useful	68%	24%	6%	2%	
Presenter was well informed	61%	34%	6%		
Liked presentation style	27%	46%	27%		
Appropriate amount of information	40%	36%	24%		
Good pace to presentation	25%	29%	42%	4%	

Additional Comments:

- The AM (Zone'in) part of the session was useful to me
- Lots of information at once
- Answered all my questions completely; helped us to stay focused
- Awesome but long
- Too much info, not enough time
- Good in the AM (Zone'in), a little too heavy on printing in the PM (Move'in)
- You are a very dramatic speaker possessing a great deal of verve and animation – smart.
- Space out the afternoon with more direct participation – get our names
- Very good and will help me understand children more
- Would like more info on multisensory information to help kids get in the Zone
- Move a little faster with the Move'in game squares, as took too much time for each square. It was hard to pay attention for some of them
- A little quicker when it comes to the Move'in game.
- More hands on would be good, especially for the afternoon session
- Some of it was useful to me, some of it I didn't agree with
- I think the game would be difficult for my students. I would rather learn and see more skills for teaching printing
- Don't stop the video during the workshop; let play and have discussion afterwards
- Interesting info but would like it to be shortened and more concise

Would you recommend this workshop to others?

- Helpful to us all
- A lot of useful information, techniques and strategies in easy to use format
- Our children need to move more and watch less TV, play less videogames
- Yes

- To mothers or parents with kids addicted to TV/videogames, this will teach them to cut down so kids will learn more in school
- Good information, very useful to all grades
- Informative for all ages starting from toddlers
- Very useful information, will try it in the classroom for sure
- It is good and valuable, pragmatic, fun and just right for First Nations
- It is so important for the kids
- Yes – with additional info available on multisensory info
- Because it is solution oriented and it is practical
- The speaker was really informative and had great evidence! I liked the first session (Zone'in) a lot, but the second session was good too!
- The presentation was very useful especially for teachers that have special needs students. Good job
- Unsure
- Too much focus on a game. Speaker had good background knowledge but I don't feel like I'm walking away with a new teaching skill
- Because a lot of people don't feel that it's needed

If no, why not?

- The game would be difficult for younger students especially to stay on task. Would need more info and help in younger grades
- Found it longer than it needs to be
